PROFILE

I am a young, energetic youth with energy and time to channel through. I am a dedicated and seasoned Laravel developer with over 4 years of proven expertise, specializing in meeting organizational staffing needs and surpassing project requirements. A results-driven professional, I leverage exceptional personal, problem-solving, communication, and organizational skills to lead and complete tasks, consistently improving departmental efficiencies.

PROFESSIONAL EXPERIENCE

Full-stack Developer   06/2024 – present
DigiNep   Kathmandu, Nepal

Mid. Laravel Developer   11/2022 – 05/2024
Sysqube Technology 🔗   Kathmandu, Nepal

Here i am required to develop new projects on new requirements, maintain existing laravel projects with seamless integration with existing codebase. Develop database, maintain clean codebase. Besides coding, I am also required to provide assistance, communicate with clients to understand requirements and expectations, gather feedback, and keep them updated on the status of the project.

Jr. Laravel Developer   09/2021 – 11/2022
Bhugolpark 🔗   Kathmandu, Nepal

I was responsible for maintaining and enhancing the BhugolPark and Hamro Neta websites. This involved ongoing tasks such as ensuring the websites' stability and security, regularly updating software to address vulnerabilities, and optimizing the codebase for better performance. Besides this, I was also constantly developing new features and integrated it with the existing system seamlessly.

PROJECTS

Cedro 🔗   2022

Cedro is a business website for crypto currency. It is created using Vue.js

DarataChalani 🔗

Grievance submission platform

This system has been created using Laravel, React. I primarily focused on the backend portion of this project. I was tasked to maintain database, create API, complete CRUD operation for grievances and logically maintain the flow of grievances.

Lapsi Cloud 🔗   2021 – 2022

Cloud Service Provider

Lapsi is a cloud service provider, where u can subscribe to a service and continue it like. Here, we had to work with API, make sure that the Api endpoints are not exposed, work on subscription-based model, maintain roles and permissions and many more.

Bhugolpark 🔗   2021

Polling Platform

Bhugolpark aims to be the best polling, news platform in Nepal. The site was created in Laravel and ever since has been maintained in Laravel. I completed multiple CRUD operations for multiple new functionalities using Service Repo pattern. During the election in 2022, we created functionalities to import the data of candidates, display it, and update it in real time. We also created APIs so that they could be distributed to interested parties.

Certifyi.ai

Certification platform

Certifyi is an AI-powered Governance, Risk, and Compliance (GRC) platform designed to simplify compliance, mitigate risks, and build trust. It automates repetitive tasks like evidence collection, reporting, and controls testing while providing real-time insights into your compliance posture. By integrating with your existing systems, Certifyi ensures continuous monitoring and proactive risk management.
